

## Mecuris agrees with Ottobock on technology transfer

**Munich, February 29<sup>th</sup> 2024** – Munich based Mecuris GmbH and Ottobock SE & Co. KGaA, a global orthopaedic industry leader, agreed on the transfer of technology for the creation of individualized O&P devices. The software developed for the Mecuris Solution Platform enables orthopaedic technicians to design and build customized 3D-printed prosthetic- and orthotic-products. Related patents protecting the Mecuris Solution Platform are acquired by Ottobock. The conditions of the transaction are not disclosed.

**Johannes Schneider Littfeld, Mecuris' Chairman of the Board, comments:** *„We are pleased to see Ottobock integrating our technology in their digital development for the benefit of the O&P clinics worldwide.“ Ottobock states: “As a pioneer in the digital change in orthopaedic technology, we provide our users and customers with innovative technology. In addition to our own developments, we are committed to maintaining and developing smart solutions and good ideas. By integrating Mecuris know-how, we increase the added value for our customers and strengthen Germany as a location for innovation.”*
